

GENERAL CONTRACTORS LTD

COMPANY PROFILE

About Us

We are an engineering construction company based in Nairobi, Kenya, established in January 2017 with a commitment to finding new way of enabling our clients get highest quality services and the finest products. We have a team of young energetic experts equipped with core skills within their fields. We aim and intend to offer expert services to our clients. We specialize in design and build (civil), building works and supply of construction materials. We work in ways that suit our clients' demands. We are committed to giving our very best. We provide our clients with complete designs, engineering capabilities and material supply that are greatly related to construction works to positively impact the projects we are involved in by lowering cost and time used to access materials. Due to the rise and advancement in technology in the construction industry worldwide our expert services are paramount. Considering our exposure in construction sector we believe we are fully equipped to face any challenges that may arise. We are experienced in providing quality products and services.

Company Overview

WHY CHOOSE US

- We are cost and time efficient
- We will provide you with a safe and quality end product.
- We listen and are flexible enough to adjust to your needs.

↗ TIME AND QUALITY

At FEPP we work with the aim of meeting our clients' deadlines and providing quality end products. This is enabled by our highly qualified and motivated staff/employees. The English men say 'Time is Money', we neither purpose nor intend on wasting yours.

↗ HEALTH & SAFETY IN THE WORK PLACE

Our first obligation is to ensure a safe and healthy work environment for our employees and protect our clients' facilities. We are proud to say that some of our staff have IOSH accredited certification in Health and Safety whose role is to train others in matters to do with Health and Safety in the work place. We believe that by complying with our Health and Safety risk control procedures we are capable of accomplishing zero accidents when working.

↗ OUR H.S.E RISK CONTROL PROCEDURES.

Eliminating the hazard

This is the first and most effective method of risk control. We do this through use of safe tools and equipment.

Reducing the hazard

This is the next preferred option after the above. We try doing this by ensuring that we are working with trained and competent staff/employees.

Preventing people from coming into contact with the hazard

By keeping distance between people and the hazard (storage of harmful chemicals in a remote location, use adequate safety signs in areas with anticipated significant risk).

Safe Systems of Work (SSOW)

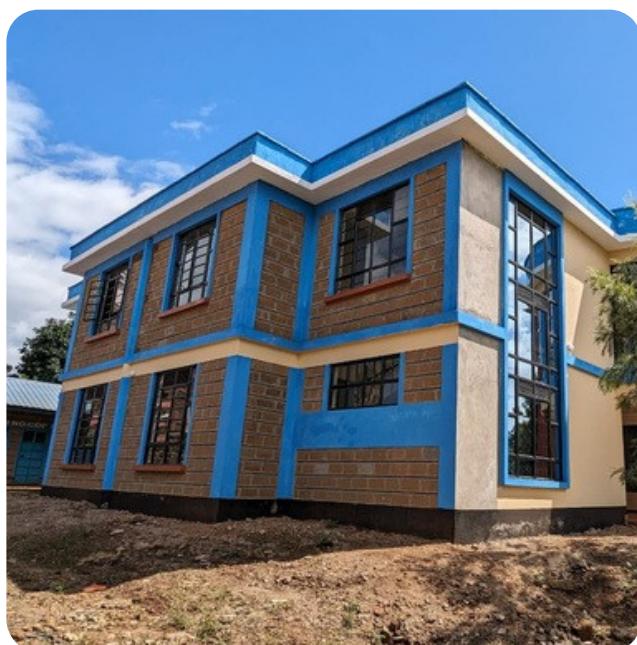

This involves safety procedure, permits to work and safety rules that detail how activities should be carried out to minimise risk.

Use of Protective Personal Equipment (PPEs)

We purchase and encourage everyone working on our sites to wear reflectors and hard hats, also goggles and respiratory protection where need be.
